Property Owner In Long Valley Estates

RE: Completion of Long Valley Estates Water System

Dear Property Owner

The Kane County Water Conservancy District (KCWCD) is pleased to announce the completion of the Long Valley Estates Water System. As of December 31, 2009, the water system is online and ready to deliver culinary water to all lots within the subdivision.

All water meters have been installed and are ready for use. Remember, it is the property owner's responsibility to hook the meter into an existing water line or to a yard hydrant or other structure. If you have not already made your connection, a list of contractors who have shown interest in hooking up customers on Cedar Mountain is available on our website at www.kcwcd.com. Please be advised that these contractors are in no way endorsed by KCWCD, this is a list for your reference only.

Please also be aware in hooking up to your new meter that water pressures in this new system can reach above 100 PSI in some places, therefore we highly recommend installing a pressure reducing valve when hooking into your new water meter. Also, a key will be required to turn your meter on and off at the street. Keys must be purchased by the property owner and are available in Duck Creek at the Loose Wheels gas station and at Duck Creek Hardware. Please refer to the enclosed meter diagram to become familiar with this procedure. Also, please read through the KCWCD guidelines and procedures on the opposite side of the diagram.

Your first bill will be processed at the end of January and you should receive it by the first week in February. Due dates for payments are right around the 15th of each month. If you have any questions or require any further information, please contact our office.

Sincerely,

Donna Ray
Billing Clerk
